Image

Stats

button

This will display a mock up of the ar image

Displays stats that the user will use to unlock different ar models as well as the different avatar images respectivly

Enables the character to be displayed in AR mode
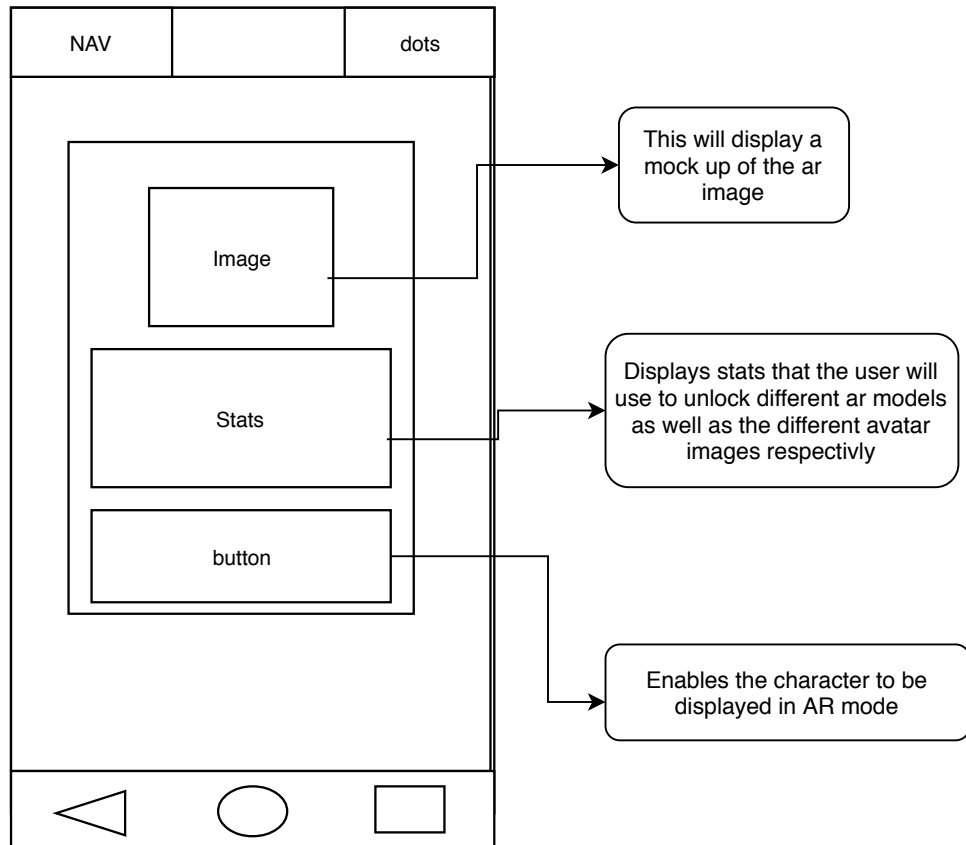

This is the fragment that will contain the nesseccary things to display the AR model.

This fragment is mainly for the taecher as this will write to the database and let the teacher update points according to how the student has done in a real world assigment.
